CANDIDATES SEEKING OPPORTUNITIES

Manufacturing and Operations Executive with 20 years experience in the medical device industry. Demonstrated success in developing effective strategies and driving operational excellence to strengthen the company's competitive position. Proven track record in leading all functions of the supply chain in a high growth and dynamic business environment. Recognized for leadership, strategic thinking, problem solving and team building abilities. Strong communicator and hands-on manager with a consistent record of achieving results.

Executive with successful track record in strategic planning, business development, operations management, mergers and acquisitions, financial planning, SEC reporting, and human resources. Looking for an aggressive, growth-driven company in need of a key member for their management team.

Candidate with MSc (Engg) from the University of Leeds, England, seeks opportunity within a highly commercial and contemporary orthopaedic environment.

Candidate with skills and interest in product development, design and manufacture seeking an engineering position with a medical device/biotechnology company.

Candidate interested in entering the field of orthopedics in a project management, operations, marketing, or sales operations capacity.

Candidate seeking entry-level position in the field of Biomedical Engineering with a concentration in Mechanics.

Philadelphia/New Jersey based-candidate seeking employment as a sales representative or in the design and development of orthopedic implants. Extensive research in the properties of implantable materials, surface chemistries, and physiological response.

Indiana-based candidate with three years of polishing/metal finishing experience seeks full-time employment opportunity with benefits. Experience in reading blueprints, instrument dimensioning, air tooling, optical comparators, use of grinding and cutting wheels.

Indiana-based candidate experienced in Plant Management seeks position within the orthopedic industry in supervisory/management capacity in manufacturing, production control, quality assurance, and/or human resources.
