

Beere Precision Medical Instruments

Instrument Design, Testing & Manufacture

Unsurpassed Quality and Selection in Surgical Instrument Design and Manufacturing

Design/Engineering

Using the latest solid modeling software and onsite video conferencing greatly enhances our communication with our customers' engineering personnel. Communication is vital when jointly developing state-of-the-art instrumentation that meets the most demanding requirements of our customers.

Products

- **Ortho-Grip®:** The "Original" silicone rubber handles that revolutionized the orthopedic community. There are over 100 different shapes and variations available.
- **Ratcheting screwdrivers:** Beere ratcheting screwdrivers are the standard of the industry. After a year of design and testing, per FDA/ISO requirements, Beere has launched our new ultra-precision screwdriver line that will become the new "Gold" standard in orthopedics.
- **Torque instruments:** In addition to our large line of standard torque limiting and measuring instruments, Beere is the only instrument manufacturer to offer a wide variety of variable torque limiting devices.
- **Spinal instruments:** Beere designs are today's spinal instrument standard in the orthopedic industry.
- **Custom Instruments:** Our complete "In-house" manufacturing capabilities are ready to produce instruments that meet your most challenging requirements.
- **Evolution™ Spinal Implant Removal Kit:** This patent pending, universal instrument set, will remove most of the spinal implants in the market today.
- **Manufacturing Facility:** To insure on-time delivery, we manufacture your instruments in our 68,000 sq. ft., state-of-the art manufacturing facility in Kenosha, Wisconsin. By the end of the 4th quarter of 2003, we will have added over \$1,500,000 in new equipment.
- **KMedic:** The joining of the two most respected names in surgical instrument manufacturers, Beere and KMedic, has resulted in a single source for your instrument needs. The team offers over 3400 high quality surgical instruments for spinal and orthopedic procedures.

Quality

At Beere, quality is instilled into every instrument we produce. More than just an FDA registered medical device manufacturer (reg. #2132732), we are also certified through BSI to the following quality systems:

- ISO 9001
- EN46001
- ISO 13485 (meets FDA QSR requirements)

Customers who trust in Beere

Beere is an approved instrument supplier for over:

- 300 domestic customers
- 70 international customers

Beere and KMedic are part of the Teleflex family of companies. Teleflex is a publicly traded, Fortune 1000 company on the NYSE (TFX).
