Facility

30,000 sq. ft.

Staff

70 employees

Certification

FDA-registered

Engineering—

We work with our OEM customers on an engineer-to-engineer basis to define requirements and develop concepts. Holmed's many years of experience in handheld surgical instruments plays a valuable role in new product evolution. We have a solid background of designs, materials, tolerances, and the quality demands of the orthopedic industry.

Design—

CAD operators using AutoCad software transform concepts into final designs and manufacturing drawings.

Fabrication—

Our skilled prototype machinists work in house with the best equipment available. When required, we work with local testing labs to ensure specification, safety, and efficacy of products.

Production—

Our extensive manufacturing plant produces thousands of parts each month. These parts are assembled for product orders as small as one piece, and as large as 2,000 instruments.

Advanced Capabilities—

- Design and Engineering
- Laser Marking
- Passivation
- Swiss CNC Machining
- Standard CNC Turning
- Polishing
- CNC Milling
- Wire EDM
- Electropolish
