Exclusive at Huron: Comparative Performance Testing (CPT)

Huron Tool has designed an innovative approach to qualify the *consistent performance* of your product. We will eliminate all subjective testing of your product by utilizing our specially designed test stand. Ultimately, you can provide your surgeons with the comfort they need that your product will perform consistently each and every time.

Continuous Commitment to Quality — It is our corporate policy to operate at the highest industry standards. We work closely with our customers and suppliers to continuously maintain shipment of zero defect products, while accommodating all delivery requirements.

We have adopted a forward-looking view on future business decisions. Huron Tool's compliance to the ISO 9001:2000 Standard has merely established a strong foundation for our continual improvement initiatives.
