

Nemcomed

“Be the Premier Medical Solutions Provider”

People

Founded in 1976, Nemcomed develops and manufactures precision medical devices that assist surgeons in providing improved quality of life for their patients. Our dedicated focus to this mission enables us to provide premier medical solutions to our customers.

We control our processes from engineering to manufacturing to final inspection, delivering devices and value-added services that exceed your expectations, and always go the extra mile for each and every customer.

Product Development

Engineering Support

Our first-rate engineering team is comprised of dedicated professionals with years of experience in the medical device industry. Our team consists of experts in development and manufacturing engineering. If you can dream it, we can produce it.

Research & Development

Our in-house R&D team can develop your medical device concept into a finished product that reliably performs to exacting standards.

Custom Prototyping

As part of our commitment to you, we've devoted a separate facility to prototyping, allowing us to respond quickly, particularly for those times when:

- Custom instrumentation is required to meet special surgeon needs
- Low Volume Production is required
- Prototyping is needed to prove a concept during the development stages

Machining Technology

Because we're committed to designing and manufacturing the highest quality precision medical devices, we constantly invest in state-of-the-art technologies. To meet our customers' complex requirements, we utilize numerous technologically advanced machines, including:

- 4 and 5 Axis CNC Mills
- Citizen Swiss Turning Centers
- Eldorado and Dadson Gun Drills
- Wire EDMs with Indexing Capabilities
- Ultrasonic Cleaning, Passivation, Laser Marking

Orthopaedic Splints

Nemcomed also offers a full line of orthopaedic splints. Our aluminum splint line is both x-ray translucent and malleable, for a form fit. The foam padding and electrostatic powder coating enhance the comfort fit. ask about our full line of finger, hand, arm and leg splints.

Facility

51,000 sq. ft.

Certification

FDA-registered
ISO 9001 in 2004

Background

In 1976, Nemco started as a contract machining operation in a 5,000 sq. ft. storage building with three employees and outdated equipment in dire need of repair.

In 1977, an appointment with a medical company established the foundation for a path that would ultimately change our future plans.

By 1981, Nemco added 5,000 sq. ft. to the original building and employed a staff of 16. Steady growth continued through 1990, when we built a 31,000 sq. ft. facility to meet the growth demands of the company.

In 2000, Nemco was purchased and merged with CoMed, an orthopaedic splint manufacturer, to create the current company Nemcomed.
