

Precimed

Design, Development and Manufacture of Precision Surgical Products

Reamers — acetabular, patella, glenoid and calcar; straight or flexible intramedullary reamers.

Drills and taps — twist, flexible and cannulated.

Broaches — our new broach tooth concept with continuous helical tooth pattern—tooth size adjusts progressively so that the distal teeth are finer and the proximal teeth are more aggressive. This distributes the teeth to provide a more efficient cut.

Handles — quick-connect and ratcheting handles, angled drivers, flexible shaft and bayonet-mount modular tools.

Screwdrivers — straight, u-joint, cannulated, flexible/reversible.

Screws — custom or standard bone screws.

Trauma Sets - Acetabular Instrument, Mini Fragment, Small Fragment, Basic Fragment, Compression Plate, Cannulated.

Manufacturing —

- State-of-the-art 4 and 5 Axis CNC machining centers.
- Full product surface finishing capabilities to provide shelf ready product.
- Automated product flow controls for timely and accurate product/order traceability.
- State-of-the-art CAD/CAM interface for accurate, rapid, and reliable engineering services.
- Watch Maker Quality from established craftsmen.
- Field support group with extensive industry experience and applications expertise.

Operations —

Precimed operates two production facilities in Switzerland in Orvin and Sonceboz. Sales and distribution offices are located in the United States, France, Japan and Asia.

Our partnership with Riley Medical enables us to provide complete solutions for trays and instruments.

Focus

Implants and instruments for orthopaedic and trauma surgery

Background

Precimed is located in the northern part of Switzerland, in the midst of the famous Jura Mountains where the Swiss Hi-tech watchmaking industry is centered.

Precimed started life as the high precision cutting tool division of a world renowned Swiss watchmaking group.

Precimed became an independant private entity back in 1988.

Experience in the medical field goes back over 20 years.

US FDA registered facilities opened in 1998. Worldwide sales and support including Europe, North and South America, Africa, Asia and India.
