

# S.S. White Medical Products

**Custom Instrumentation, FAST**

**S.S. White Medical Products Inc. is a world class leader in the design and manufacture of surgical instrumentation.** Our full service facility provides you with prototype to production capabilities with speedy turn around times. Years of service have earned us the trust and respect of the largest surgical orthopedic implant manufacturers worldwide for their contract manufacturing needs. We provide standard and custom instruments as well as contract manufacturing services.

**Our popular Winquist II™ Universal Extraction System: Nails-Plates-Screws** is the second generation to the "original" Winquist® system as designed by S.S. White Medical Products and Dr. Winquist. The Winquist II™ contains all the instruments featured in the "original" set and has also been enhanced with newly designed components to accommodate recently introduced intramedullary screw, plate and nail systems currently on the market.

The Winquist II™ Universal Extraction Systems: Nails - Plates - Screws contains our patented Captive Twist®, a remarkable concept that features a unique slightly twisted design on working driver tips that tightly grip fasteners. This is especially ideal when surgeons are guiding screws into areas that are not necessarily clear.

Having the right resources and equipment enable us to tackle sophisticated tasks that lesser equipped manufacturers are forced to outsource. S.S. White Medical Products Inc. is the company to rely on for your prototype to production needs.
