Focus

Custom and standard surgical instruments.

Custom and standard cases

Implant components.

Complete sets.

With eight locations worldwide and local representation, we are strategically positioned for global product launches, from the smallest instrument to the largest system.

Symmetry Medical's unique co-development process means you receive full attention from start to finish. We design, develop and produce custom and standard instruments, cases and implants.

Many companies claim to offer a complete system, but Symmetry Medical systems are available with the instruments and small implants fully loaded in the cases, inspected, documented and ready to use - all with uniform design and finish. Symmetry Medical is not just a supplier but a business partner that offers value-added programs. Programs like:

- "Dock-to-stock"
- Certification Programs to help minimize incoming inspections
- Design assistance and prototyping expertise
- Joint planning activities and project management to reduce lead times
- Co-development process to help get your product to market more quickly
- "Fast Cast" rapid prototyping for quick product turnaround
- Innovative Symmetry products
