

# Precision Metal Machining, Inc.

Specializing in the Production of Orthopaedic Instruments and Implants.

**PMMI** specializes in the production of total joint implants and associated instrumentation.

**PMMI** has a dedicated staff that will give your project the attention you expect. We have developed a talented team that has a broad base of knowledge in machining exotic materials including titanium, cobalt chrome and plastics.

At **PMMI**, we excel in producing quantities that range from prototypes to full production runs. We can also offer assistance during the design & development process to control costs.

**PMMI** specializes in CNC and Manual Milling and Lathe Machining, as well as Wire EDM Services. We have extensive Surface Conditioning capabilities, as well as Engraving and Heat Treating services available on-site.

**Knee – Hip – Spine – Shoulder – Oncology**
