

**Turning Concept into Reality**

**With Age Comes Experience** — More than 45 years of dedicated experience in specialized cutting tools has given Huron Tool the advantage in the orthopaedic industry. Our expertise in prototype development, cutting edge technology and complete project management assures the most cost effective approach to your orthopaedic needs.

**Exclusive at Huron: Comparative Performance Testing (CPT)** - Huron Tool has designed an innovative approach to qualify the *consistent performance* of your product. We will eliminate all subjective testing of your product by utilizing our specially designed test stand. Ultimately, you can provide your surgeons with the comfort they need that your product will perform consistently each and every time.

**Product Development • Quality Assurance • Purchasing**  
*Call Huron for further details*

**Continuous Commitment to Quality** — It the company's policy to operate at the highest industry standards. We work closely with our customers and suppliers to continuously maintain shipment of *zero defect* products, while accommodating all delivery requirements.

We have adopted a forward-looking view on future business decisions. Huron Tool's certification to the ISO 9001:2000 Standard has merely established a strong foundation for our continual improvement initiatives.
