

Orthopedic Surgical Instruments

KMedic, a leading supplier of orthopedic surgical instruments, is a certified vendor to many of the world's most respected orthopedic and spinal companies.

Through the KMedic Total Instrument Management (TIM) program, customers find a partner who consistently demonstrates the ability to design, develop, manufacture and package a wide array of custom and standard instrumentation.

KMedic offers companies supply chain management for orthopedic surgical instruments. In most of our relationships, we serve as a long-term, strategic partner—developing entire instrument lines and custom instrumentation. We are the resource of choice for specific instrumentation—providing highly crafted instruments in small and large quantities. Our customers value our commitment to providing a total solution for their instrument needs.

Design, Development and Manufacturing Capabilities

- Design Software: Solid Works and Auto-CAD
- Processes: passivation, thermal assembly, certified special stainless steel TiN and TiAlN coating process
- Domestic and International Manufacturing: multi axis CNC machining and turning centers, swiss type multi axis CNC turning centers, CNC grinding, CNC robotics, wire and ram EDM equipment, laser marking, electro chemical etching, tool room, welding, soldering, brazing, stamping, bending, honing and broaching

Services

- Engineers on staff work with your design surgeons to minimize time to market, from the design phase to prototyping and through delivery
- Instrument design expertise
- Forging design and management
- First Article Sample (FAS) work
- Quality Assurance inspection and certification
- Full product packaging and labeling
- Inventory management
- EDI service
- Quick response from our customer service, product development, QA and packaging engineering staff

Background

Founded in 1986, KMedic is a leading provider of Orthopedic surgical instruments.

In 1999, KMedic became part of Teleflex Medical, a division of Teleflex Incorporated (NYSE: TFX), a worldwide leader in the design, manufacturing and distribution of high-quality engineered surgical instruments, medical devices and healthcare supplies.

In 2003, KMedic and Beere joined together as Teleflex Medical OEM Orthopedics to provide a single source for customers' instrument needs.

In 2005, KMedic and Beere US are located together in the same facility in Kenosha, WI.
