

Your Needs. Our Focus.

What do you want to accomplish?

Onyx Medical Corporation is dedicated to being your strategic partner — helping you bring new prototype ideas to life, developing new ways to meet your manufacturing goals and producing high-quality precision trauma parts.

Our FDA-registered and ISO-certified facility in Memphis, Tennessee, offers customers unparalleled access to worldwide distribution and specializes in manufacturing comprehensive lines of wires, guide pins, half pins, drills and screws. Onyx's engineering team can also assist in the manufacturability of your most challenging parts.

Our goal is to provide a total solution of the highest value — one that includes superior quality products, enhanced customer service, reliable quotes and delivery, and impeccable performance of both your finished parts and our quality team.
