

Implants - Devices - Clean Room Packaging

Full Service Medical Device Contract Manufacturing

With so much depending on the performance of your product, the need for absolute precision can be a life or death issue. That's why, for over 40 years, orthopaedic and spinal companies have turned to Specialized Medical Devices for their most demanding medical devices and implants.

SMD manufactures the most demanding Swiss Screw Machine products to within +/- .0001".

From prototype development to full production, SMD's experienced engineers turn your design concepts into the finest quality medical products.

From small run, individual components to full scale production and assembly, SMD is the first choice for Orthopaedic and Spinal companies. Because the pursuit of perfection--repeatable, consistent precision products--is an ongoing process. A process that SMD is committed to on every project. For one very important reason: Because you can't afford anything less.

Ultra precision CNC 5-axis vertical milling and CNC 10-axis screw machining of complete implant systems as well as complementary disposable and reusable instruments.

Specializing in titanium, stainless steel, cobalt chrome and PEEK as well as exotic metals.

Turnkey finishing services include titanium anodization, laser marking, vacuum heat treating, passivation, electropolishing and bead blasting. Dimensional tolerances to within +/- .0001.

- Contract Manufacturing
- Clean Room assembly & packaging
- Contract Packaging
- 5-axis CNC Vertical Milling and Wire EDM
- 10-axis CNC Screw Machining
- Implants: connectors, hooks, plates, rods, screws
- Devices: awls, anchor inserters, biopsy, drivers
- Quickturn™ Prototyping

Dedicated to meeting the most demanding specifications: using a product realization process based quality management system certified to ISO 13485:2003, Directive 93/42 EEC and maintaining compliance with the FDA CGMP/QSR with capabilities for AQL sampling and SPC.
