GAUTHIER BIOMEDICAL INTRODUCES NEW CAPABILITIES BROCHURE

GRAFTON, Wis. – Gauthier Biomedical, a leading provider of orthopedic and spinal instrumentation, has introduced a new brochure featuring the company’s capabilities, manufacturing and prototyping services and ISO certification.

Gauthier Biomedical is the inventor and first company to market no-play ratcheting screwdrivers, which allow orthopedic surgeons to obtain a solid and precise feel when tightening screws, connectors or locking implant constructs.

Gauthier Biomedical’s extensive background in engineering and orthopedics is a driving force in their pursuit to provide the highest-quality tools in the handheld orthopedic and spinal instrumentation market. Gauthier Biomedical excels at customizing solutions for the most specialized needs.

Gauthier Biomedical offers a comprehensive line of spinal and orthopedic instruments and production contract manufacturing services to Orthopedic OEMs in the U.S., Europe and Asia. Gauthier Biomedical is FDA registered and ISO 13485:2003 certified.

To learn more about Gauthier Biomedical and view their extensive product line, visit www.gauthierbiomedical.com or call 1-866-546-0010.
