TELEFLEX MEDICAL OEM ANNOUNCES LAUNCH OF CENTAUR™ PRODUCT LINE

Kenosha, WI - Teleflex Medical OEM, a preeminent global outsource provider of medical devices and orthopedic surgical instruments, is adding the CENTAUR™ torque-limiting ratchet driver to its Beere Medical® product line. This new addition to Beere Medical's surgical instrumentation offering introduces a torque-limiting option on its TRU-CONTROL® ratcheting products.

"Beere Medical is one of the pioneers in the development of both ratcheting and torque-limiting technologies for the orthopedic market. Therefore, it only made sense that we are one of the first to offer our customers the option of combining a torque-limiting mechanism with our ratchet products," stated Chad Ryshkus, product manager for Teleflex Medical OEM.

The CENTAUR™ utilizes Beere Medical's industry-proven technology for torque-limiting and ratcheting products to offer an all-in-one product that eliminates the inefficiencies OEMs face in supplying both products in their kits or systems. "We've been focusing our new product development efforts on the ease of use by the end-user. By reducing the number of instruments required for a procedure, the time and complexity involved in changing out each instrument can be eliminated," Ryshkus added.

The CENTAUR™ torque-limiting ratchet product line will be available on a large assortment of Beere Medical's Ortho Grip® handles.

Samples of the CENTAUR™ products will be on display at the MD&M East 2007 show in New York, NY, June 12-14, 2007 and at the Orthopedic Manufacturing & Technology Exposition and Conference in Rosemont, IL, June 20-21, 2007.

For more information on the CENTAUR™ product line and other products offered to the orthopedic industry through the Beere and KMedic products, visit: www.teleflexmedicaloem.com or email oeminfo@teleflexmedical.com.

About Teleflex Medical OEM

Teleflex Medical OEM is a preeminent global outsource provider that focuses on medical devices and orthopedic surgical instruments and comprises four industry-leading brands: Beere Medical®, KMedic®, Deknatel® and TFX OEM™. Teleflex Medical OEM provides dedicated engineering and technical services to help ensure the successful transition from concept through development, manufacturing, and product packaging.
